### Oskar's M - 710 Mould Release Paste Wax

#### General:

OSKARS M-710 is a mold release wax based on a composition of carnauba wax of the highest quality, in combination with other waxes, paired with special binders and modifiers. It is especially suitable for the lighter processing of polyester and epoxy molds, and is characterized by a good heat resistance. Wax deposits in the mold are prevented.

#### Properties:

Appearance:	pasty
Colour:	beige
Odour:	characteristic
Density:	~ 0,71 g/cm <sup>3</sup> at 20 °C
Flashpoint:	°C

#### Comments:

M - 710 is one component our OSKAR'S MOULD RELEASE AND MAINTENANCE SYSTEM. More detailed information regarding this system can be supplied upon request. This documentation describes the application of M - 710 as well as the other parts of this system.

#### Storage:

M - 710 has a shelf life of at least 24 month if stored in its original, unopened containers in a dry and cool place. Avoid freezing and prolonged temperatures above 30°C (86°F).

#### Note:

Safety data sheet available on request.

The data given above are based on current knowledge and experience. The data do not signify any warranty.
